Why Do the Race/Ethnic Groups Not Add Up To 100%?

Most often, this occurs when users report data for the full Hispanic population with race groups.

The U.S. Census Bureau collects race and ethnicity according to OMB standards, and they are two distinct concepts.

Why Am I Getting “Data Not Available” Message? Why Do I Not See Columns for All Selected Race/Ethnic Groups?

Minimum population and/or unweighted sample case requirements have not been met.

Use a higher-level race group, ethnic group, or geography. Or use iterated tables that have lower population thresholds.
